📍 San Francisco Bay Area

Professional Summary

Customer-facing infrastructure and solutions engineer with **7+ years** designing, validating, and automating data center and cloud networks. I lead PoCs, technical workshops, and escalations; translate customer requirements into roadmap decisions; and partner with engineering through validation and deployment. My background spans IP/MPLS, EVPN/VXLAN fabrics, network performance testing, Kubernetes, and private multicloud networking, with working knowledge of RoCE/RDMA requirements.

Product & Roadmap Impact

- Turned customer requirements and PoC findings into roadmap priorities, then tested and validated data center networking and automation features for release to customer networks
- Led **100+ workshops and demos**, helping field teams, service providers, and enterprise customers understand new products and prepare for successful launches and adoption

Professional Experience

Senior Solutions Engineer

Sunnyvale, CA

Nokia of America Corporation

2023 - Present

- Advise customers on the architecture and deployment of Nokia IP/MPLS routing, switching, and data center solutions
- Lead workshops, PoCs, and demonstrations of data center management solutions, including Nokia EDA and its Kubernetes-based declarative model for managing data center fabrics
- Test and validate management software, network-device features, and end-to-end solutions for customer networks, reproducing and resolving issues with engineering
- Optimize network fabrics with traffic generators and present the results at conferences and customer demonstrations
- Build and operate highly available lab infrastructure for customer solution testing, including load balancers, bare-metal provisioning, management platforms, and Ceph storage

New Product Introduction & Network Design Engineer

Antwerp, Belgium

Nokia Bell N.V.

2018 - 2023

- Served as the EMEA technical lead for Nokia's IP Data Center portfolio
- Led network design, integration, and testing for business-critical customer projects
- Built automation connecting network platforms with AWS, Azure, GCP, and container orchestration systems
- Ran 10+ product workshops across EMEA, preparing field teams, service providers, and enterprises for new product launches

Earlier Engineering Experience

Belgium & Mexico

Nokia Bell N.V. (2015-2018) | Eutelsat Americas (2010-2013)

2010 - 2018

- Built automated end-to-end tests for Nokia 7x50 service routers and network test tools, allowing the team to run twice as many regression tests
- Supported 24/7 operations for a four-satellite GEO fleet and improved remote diagnostics and infrastructure migrations

Education

KTH Royal Institute of Technology & UCLouvain

Sweden & Belgium

Master of Science

2013 - 2015

Information and Communication Technologies (MERIT)

Specialization: Signal Processing, Data Networks and RF Systems

Erasmus Mundus scholarship recipient

Universidad Nacional Autónoma de México

Mexico City, Mexico

Bachelor of Science

2007 - 2010

Telecommunications Engineering

Focus: Radiocommunications

Academic Excellence scholarship recipient

Technical Skills

Networking	IP/MPLS, TCP/IP, BGP, OSPF, IS-IS, VXLAN, EVPN, Nokia SR Linux, Nokia SR OS
Automation	Python, Go, Bash, Ansible, Terraform, REST APIs, CI/CD, GitOps, Infrastructure as Code
Fabric Performance	Traffic generators, Network optimization, RoCE/RDMA requirements, NCCL/RCCCL familiarity
Cloud Networking	AWS, Azure, GCP, Private networking, Multicloud architecture
Container Platforms	Kubernetes, CNI, CSI, OpenShift, Docker
Virtualization	VMware vSphere, KVM, OpenStack
High Availability	Ceph storage, firewalls, load balancers
Systems & Bare Metal	Linux administration, BMC, PXE, DHCP, BIOS/firmware lifecycle, Air-gapped environments
Data & Observability	PostgreSQL, MySQL, InfluxDB, Prometheus, Grafana

Languages

Spanish	Native
English	Proficient
French	Working proficiency (B1)

Interests

A lifelong computer enthusiast, I enjoy home automation and small DIY projects, deep dives into aerospace, aviation, and geography, and time in nature. Lately, I have been exploring economics and philosophy.
